

HiLo T35 Tank Sensor Data Sheet

High accuracy radar sensor designed specifically to measure liquid levels in water tanks. Simple to install requiring just 4 self-tapping screws. A 50mm hole is required for concrete tanks.

Email and SMS alert notifications. You can download the HiLo app from Google Play of the App Store.

Specifications

Model	HiLo T35 Tank Sensor
Housing	Polycarbonate + PBT Waterproof and UV resistant Dimensions 130x130mm
Sensor	60GHz Radar sensor Measurement accuracy 0.5% Measurement range 0.15m to 3.5m Operating temperature: -40°C to +85°C No sensor maintenance or cleaning required
Power	Inbuilt Li battery 5+ battery life depending on connectivity and reporting rate
Connectivity	Current: 4G/LTE/CatM1/NB-IoT (5G ready)
